SPORTS TECHNOLOGY. REIMAGINED.

May 18th, 2026

To whom it may concern

Reference Letter

I am pleased to recommend Svit Spindler who has worked under my supervision at Sportradar as a Software Engineer, from 01.08.2025 to 11.05.2026. The position was a permanent 100% fulltime position.

During this time Svit played a central role in the development and modernization of our enterprise application, where he demonstrated his strong technical ability, professionalism, dedication and ability to learn.

During his time in the team he proved his strong technical understanding and capability creating secure, scalable and efficient Java Spring microservices and REST APIs. This work included both creation of new microservices, as well as picking apart an existing, complex monolith application into microservices. He also proved himself very capable with tasks relating to message queues such as Kafka and MQ, and MySQL databases which are all central parts of our application.

I also want to credit Svit's ability to quickly become a contributing member of the team. Onboarding was quick and simple, definitely aided by his communication skills. One of Svit's strong abilities is asking good questions at the right time. He collaborated effectively with other developers, QA engineers and our project manager. These communication skills coupled with his curiousity and eagerness to learn drove his impressive rate of growth.

Given Svit's demonstrated skills and deliverables I have no hesitation strongly recommending him. He will be a valuable asset to any engineering team. I wish him the best of luck with any future endeavours, and his contributions will be missed.

Yours sincerely,

Henrik Holenbakken Knutsen
